Dear Mr. Rowley,

I am in receipt of your letter dated May 23, 2000, a copy of which is attached hereto.

You have two areas of concern:

1. A 3000 Foot Road.
2. Water.

Please be advised that at this time, I will not pursue these two areas. We do not need the 3000 foot Road, and we will buy a nominal amount of water from you, and make alternate plants to clean the stone. However, if in the future, I feel I may need some kind of assistance from you regarding these matters, I will ask your advice, and proceed accordingly.

Sincerely,

William J. Pappas
Manager

Dear Mr. Levin,

When you called me a few weeks ago, I thought I conveyed to you our position, yet you continue to take stone that is not yours.

We have been inexorably involved in the claims you are quarrying, for over 20 years. **We own the claims period.** Examine the record. For some reason you feel you are protected and can be held harmless because of your permit with the Bureau of Land Management. Nothing could be farther from the truth.

It should be noted that the concept of Community Pit, and the Common-Uncommon Fiasco is under strict appeal with the Department of the Interior, Interior Board of Land Appeals IBLA Case Number 2000-UTU 078273, and will be furthered in Federal District Court.

Additionally, we have a forthcoming report from the Department of Transportation. It is our contention, that our stone, that you have extracted from our claims, has been transported to your customers **across state lines**.

You stated you are in the stone business, and refer your matters to your lawyers. We feel that is a good idea for you. Please advise me if you will be accepting service for our law suit that will be postured in the United States District Court, for the District of Utah.

If not, please provide us with the name of your lawyers, so that our lawyers, who have already outlined our suit, may serve your law firm, and begin depositions with **all** parties involved. Discovery will provide us with your customers, your operation, your operating costs, and selling prices of our stone. By your actions you continue to compound your problem. That is your choice.

Sincerely,

William J. Pappas
Manager
